Superspray™

Build at the Speed of Life

2016 Census found that two-thirds of Australians are now living in cities. Our urban population is growing at over 10% per year, putting pressure on the space we live, work and play in. The modern urban lifestyle demands that we build better, taller, faster and more efficiently. Materials, systems and tools need to be up for the challenge. Spray-applied concrete, or shotcrete, is just one example. This method not only places and compacts concrete in one smooth motion, but allows concrete to be placed in areas that are hard to access with conventional placement.

Yet not all shotcretes are made the same. Some brands will get the job done faster and allow other trades onto the site sooner, while others can slow you down.

To help your business keep up with the pace of construction and urban growth, Holcim has developed Superspray™, a wide range of high-performance shotcrete mixes that are reliable and resilient.

Our urban population is growing at over 10% per year, putting pressure on the space we live, work and play in. The modern urban lifestyle demands that we build better, taller, faster and more efficiently.

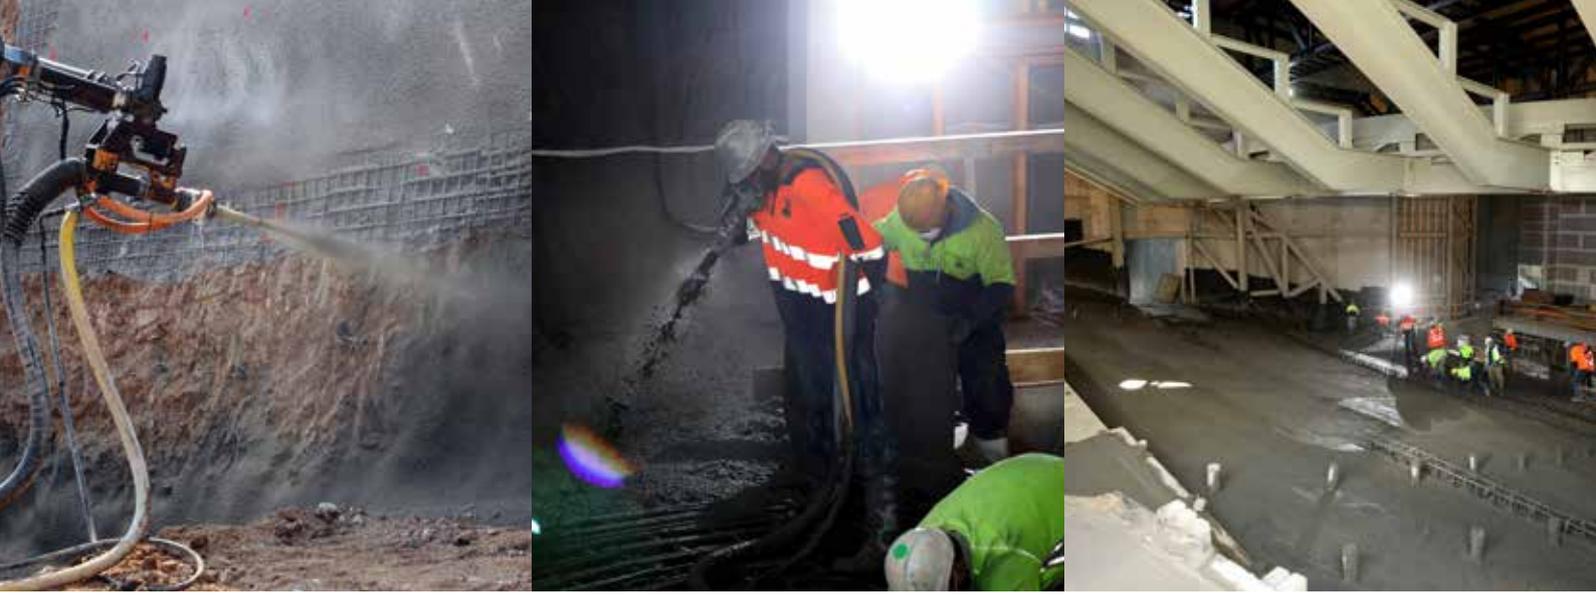

Why choose *Superspray*[™]

Holcim has designed Superspray[™] to offer high performance and durability to the Civil, Commercial and Residential segments.

Advantages	Benefits
Engineered to stick – first time, every time	Less rework
Low rebound	Reduced wastage
Rapid mix set time	Better quality of finish
Mix consistency for faster finishes	More productive labour
Range of durable mixes which are compliant with roads authority specifications	Confidence in the stability of a certified product

Superspray™

Selecting the right product

- Holcim offers a range of individual Superspray™ mixes to suit various applications.
- And what we don't have, we'll work with you to develop or customise.
- Use this table to quickly identify the Superspray™ product you need for your project. Then simply give us a call on **13 11 88** to confirm the product requirements and place your order.

Applications	Residential 	Multi-residential 	Commercial 	Civil
